Groundwater Hydrologist Position Available
Monday, 03 March 2014 15:29

HydroMetrics Water Resources Inc. has a full time position open for a hydrogeologist/engineering hydrologist and groundwater modeler in Oakland, CA. We are looking for a candidate with a strong grounding in hydrogeology, excellent analytical skills, and good interpersonal abilities who is interested in groundwater resources management. The groundwater hydrologists position is open for both junior and mid-level modeling positions.

HydroMetrics is looking for a candidate with 3-7 years of experience. The candidate should hold a masters degree or PhD in hydrology, geology, or environmental engineering with a focus on hydrology, hydrogeology, water resources engineering, or related discipline. Analytical and modeling capabilities are desirable. Strong writing skills are a must. Familiarity with standard groundwater modeling software is desired. Knowledge of designing, installing, and redeveloping municipal wells helpful.
